End of life statement for Serstech 100 Indicator

Serstech will end production of the Serstech 100 Indicator on December 31, 2023.

The component shortage has caused several manufacturers of unique components used in Serstech 100 Indicator to halt their production and Serstech will therefore not be able to continue production of the product after 2023. Customers considering buying the Serstech 100 Indicator are referred to the similar, but newer, smaller and more capable Serstech Arx.

Serstech will continue to support existing customers of the Serstech 100 Indicator and will offer spare parts, repair and other services until December 31, 2023.

Orders of the Serstech 100 Indicator will be served on a first-come, first-served basis for as long as stocks last.

A handwritten signature in blue ink, appearing to read 'Stefan Sandor'.
