

Simplicity. Speed. Precision.

Small enough to fit in your pocket. Become an expert in seconds.

Simplicity redefined

With Serstech Arx in hand, any operative becomes an expert at chemical identification. Quick Scan™ gives an accurate result within seconds with a single press of a button. Serstech Arx is next-generation Raman.

Find out in seconds

Serstech Arx has been designed together with police and first responder teams to solve the real problems operatives face in the field. Determine what's in front of you in seconds, without complexity. Narcotics, explosives, TICs, pharmaceuticals, chemical warfare agents.

Patented precision

The industry-first and patented autofocus functionality determines packaging material and thickness to ensure optimal accuracy and removal of interference.

Designed, developed and manufactured in Sweden.

Try it yourself
