

Serstech Arx+ IQ/OQ test kit (Article#: EA3)- Product description

The Serstech Arx+ IQ/OQ test kit consists of:

| Amount. | Description |
|---------|---|
| 1 | Sealed vial containing Cyclohexane |
| 1 | Mercury-Argon arc lamp (calibration source) |
| 1 | 1 optical fiber attached to optical fiber adapter |
| 1 | Vial holder (AC-1007) |
| 1 | IQ & OQ Printed test plan |

In addition to the above the operator will receive a training voucher for Serstech's on-line training portal allowing 1-year access to an IQ & OQ on-demand qualification course with subsequent certification, providing the necessary knowledge to perform the installation qualification (IQ) and operation qualification (OQ) checks on the Serstech Arx/Arx+ indicator

IQ/OQ is used to validate the instrument installation and operational qualities.

*The **IQ** is the documented proof that the correct instrument has been delivered and installed in accordance with the requirements set by the manufacturer.*

*The **OQ** is a test process which establishes that the functionality of the instrument is in accordance with the specifications issued by the manufacturer.*
