

Chemical threat identification

FOR PURCHASE OR RENTAL
5 years warranty included

Simplicity redefined

With Serstech Arx mkII in hand, any operative becomes an expert in chemical identification. The instrument is easily operated with one hand and with a single press of a button.

Find out in seconds

Serstech Arx has been designed together with police and first responders to solve the real problems operatives face in the field. Identifications are done within seconds of more than 17 000 substances - narcotics, explosives, TICs, CWAs, pharmaceuticals and biotoxins.

Patented precision

The patented Serstech SERS kit is used together with Serstech Arx mkII to identify dark coloured substances or mixtures with very low concentrations. The detection limit of many substances is as low as 200 ppm.

Simplicity. Speed. Precision.
