# Serstech ChemDash Mobile

## Simplicity. Speed. Precision.

## Expand the reach of Serstech Arx mkII

Serstech ChemDash Mobile transforms the way you identify chemical hazards. Seamlessly connect to the Serstech Arx mkII instrument, perform remote scans, and access comprehensive measurement data from your mobile device.

By adding GPS position, pictures, and instant report creation and sharing, Serstech ChemDash Mobile transforms the way you manage and analyze chemical data. Enhance your safety, accuracy, and efficiency with the most advanced and user-friendly chemical analysis tool available.

- Connect to Serstech Arx mkII
- Scan and record measurements
- View measurement history
- Add images, notes, and GPS location
- Create and send reports
- Create reports for Colorimetric Kits

# Serstech ChemDash Mobile

## App Features

**Connect to Arx mkII.** Establish a connection with the Serstech Arx mkII instrument for real-time data access.
**Safe Remote Scan and Settings.** Remote control the instrument and retrieve the data you need from a safe distance. Settings can be modified directly from the mobile phone.

## View Measurement History

**Easy Access to Arx Measurements.** Obtain quick access to all measurements and their associated data directly on your mobile device.
**Spectral Analysis.** View spectra and other data for analysis and comparison.

## Data Enhancement

**Images.** Add images to measurements for better documentation of both the substance and the environment where it was identified.
**Notes.** Include notes by typing on the mobile phone keyboard.
**GPS Coordinates.** Automatically add GPS coordinates to each measurement.

## Reports

**Instant Reporting.** Quickly create and share comprehensive reports on the fly.
**Sharing.** Effortlessly share detailed reports quickly and securely in PDF format. Save valuable time with immediate reporting, ensuring that critical information is communicated without delay.

## Colorimetric Kit Integration

**Incorporate Fan-her and Dabit kit data.** Seamlessly into reports for comprehensive analysis and documentation in.
**Share kit studies.** In PDF format on the fly.
