Serstech Arx mkII
Simplicity. Speed. Precision.

5 YEAR WARRANTY

Serstech Arx mkII is a handheld Raman instrument featuring autofocus technology to simplify substance identification in pharmaceutical environments.

Serstech Arx Pharma mkII supports fast and confident identification of raw materials in pharmaceutical manufacturing. With access to our pharmaceutical substance library, the device delivers reliable results in seconds—without complexity.

It minimizes interference from fluorescence and identifies even low-concentration components in mixtures using Deep Scan™.

Designed for daily use in raw material quality control, the interface supports barcode scanning, Wi-Fi, and Bluetooth.

Use Serstech ChemDash - available on both mobile and PC - to easily create and share reports across your team.
